ATTORNEYS IN MOTION *foundation*

The Attorneys In Motion Foundation is a dedicated funding and support network for women lawyers and women business owners who are seeking to start or grow their own law firms or businesses.

As most may already know, starting and growing a law firm or business demands not only dedication and expertise, but also substantial financial backing—a resource that often remains out of reach for many. Despite progress, gender disparities persist in the legal and business industry, particularly when it comes to securing startup and expansion funding. The Attorneys In Motion Foundation bridges this critical gap, empowering women lawyers and business owners to step confidently into leadership and innovation without financial limitations holding them back. By providing essential funding, we enable these women to establish and expand their businesses, creating a more dynamic and equitable future in law and business and a positive impact in their lives.

At the Attorneys In Motion Foundation, we envision a future where every woman-owned law firm and/or business has the resources to launch her dream and is given the opportunity to lead. By supporting these women, we are helping to build a future legal profession and business world that celebrates diverse perspectives and fosters innovation.

Together, we can pave the way for future generations of women in law and business, ensuring that their voices are heard, their contributions recognized, and their legacy lived.
